DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- I. Claims 1 - 9, drawn to a semiconductor device, classified in class 257, subclass 48.
- II. Claim 10 - 23, drawn to a method of manufacturing a semiconductor device, classified in class 438, subclass 14.

2. The inventions are distinct, each from the other because of the following reasons:

The inventions listed as Groups II, I do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the device of claim 1 can be made by a different process by making an electrical connection between the first and second conductive layers without measuring the electrical connection in order to detect a defect within the protective film based on the measurement result.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
